Lung cancer
Know your symptoms

- A cough that doesn't go away after three weeks
- A long-standing cough that gets worse
- Persistent chest infections
- Coughing up blood
- An ache or pain when breathing or coughing
- Persistent breathlessness
- Persistent tiredness or lack of energy
- Loss of appetite or unexplained weight loss

Smoking is responsible for more than 85% of all cases of lung cancer

You should see your GP if you have any of these symptoms
